

Car Parking & Turning

The car park for the project is situated down a track and away from the main road. It is enclosed by a fence and has one access gate leading to the track.

Car Parking

The following diagram shows 20 parking spaces for cars marked in blue. The dimensions of each space are 2.5m x 4.8m. The maximum turning circle radius possible for exit and entry into spaces is 12m.

Car Turning

Car entry into the parking area is through a single gate. The diagram below shows the entry and turning of an ordinary sized car shown as black rectangles. The car park allows a vehicle to turn around with the maximum turning circle radius of 15.5m.
